

EXHIBIT A – FINDINGS
DRC2013-00089 Kitts

CEQA Exemption

- A. The project qualifies for a Categorical Exemption (Class 3) pursuant to CEQA Guidelines Section 15303 because the proposed development is a small structure (addition) to an existing residential structure.

Minor Use Permit

- B. The proposed project or use is consistent with the San Luis Obispo County General Plan because the use is an allowed use and as conditioned is consistent with all of the General Plan policies.
- C. As conditioned, the proposed project or use satisfies all applicable provisions of Title 23 of the County Code.
- D. The establishment and subsequent operation or conduct of the use will not, because of the circumstances and conditions applied in the particular case, be detrimental to the health, safety or welfare of the general public or persons residing or working in the neighborhood of the use, or be detrimental or injurious to property or improvements in the vicinity of the use because the addition does not generate activity that presents a potential threat to the surrounding property and buildings. This project is subject to Ordinance and Building Code requirements designed to address health, safety and welfare concerns.
- E. The proposed project or use will not be inconsistent with the character of the immediate neighborhood or contrary to its orderly development the project is similar to, and will not conflict with, the surrounding lands and uses.
- F. The proposed project or use will not generate a volume of traffic beyond the safe capacity of all roads providing access to the project, either existing or to be improved with the project because project is located on Bayview Heights Drive, a local road constructed to a level able to handle any additional traffic associated with the project.

Coastal Access

- G. The proposed use is in conformity with the public access and recreation policies of Chapter 3 of the California Coastal Act, because the project is not adjacent to the coast and the project will not inhibit access to the coastal waters and recreation areas.

Archeological Sensitive Area

- H. The site design and development incorporate adequate measures to ensure that archeological resources will be acceptably and adequately protected because construction is occurring in an already disturbed area of the site.

Water Resources

- I. The capacities of available water supply and sewage disposal services are sufficient to accommodate the proposed addition because the project is an addition to an existing residence with no new bedrooms or bathrooms and will not increase water use at the site.
